## Fall 2011 Public College Enrollment and Developmental Course Enrollment Rates, 2010-11 Ohio High School Graduates

### Summary

College entry and preparation among recent high school graduates are key factors influencing the number of Ohioans who earn degrees and certificates. In fall 2011, 52,486 recent Ohio high school graduates enrolled in Ohio public colleges and universities as first-time freshmen. Seventy four percent of these freshmen enrolled in public university main or regional campuses and 26% enrolled in public community colleges. The percentage of students that continue their studies after high school is a positive development, but a large proportion of them are not prepared for college-level work in either mathematics or English. Forty one percent of these college freshmen enrolled in at least one developmental course in their first year of college. Thirty five percent enrolled in developmental math courses and 20% enrolled in developmental English courses.

Initial preparation for college level work is a critical factor in student success rates. For example, among a cohort of first-time freshmen enrolling in Ohio's public community colleges and universities in fall 2004, 13% of those who took developmental coursework in their first year earned a bachelor's degree within six years, compared to 48% of those who did not take developmental courses in their first year. Strategies for improving college success rates include both reducing the need for developmental courses through better preparation in high school and improving outcomes for students who begin college with developmental course needs. The "Ohio Core" legislation requires that college preparatory courses become the default curriculum for graduates of Ohio's public high schools, beginning with the 2013-2014 graduating seniors. In addition, the funding formulas for public higher education institutions have been redesigned to reward colleges for increasing student success, with increased payments made for successful outcomes for students

with preparation needs.

In addition to reporting data for the state as a whole, this report presents participation and preparation outcomes for graduates of each of Ohio's high schools. Those who are involved in K-12 improvement efforts at the local level have found this detailed high school to college transition information useful in raising awareness of preparation needs and outcomes.

Proper interpretation and use of this data requires an understanding of its sources and limitations. First, the remediation rates reported here, taken by themselves, do not measure the overall college preparation levels of a high school's graduating class. These results pertain only to the subset of graduates who attend public colleges and universities in Ohio, and do not reflect the preparation levels of students who do not go to college or who attend private or out-of-state institutions.

Second, developmental course enrollment is a useful, but not exact, indicator of the college preparation levels of freshmen. Students who need developmental coursework but do not take any in their first year are not included in the developmental course enrollment rates presented in this report. It should also be noted that developmental course placement policies vary across colleges, so the mix of students attending each institution will have some impact on the reported developmental course enrollment rates.

## DATA DEFINITIONS AND SOURCE NOTES

### 1. Number of Graduates from Public High Schools

Ohio Department of Education (ODE) Data Warehouse Reports:  
Graduate Count (Building)

### 2. Number of Entering First-Time Students at Ohio Public Colleges

Students enrolled in college in the fall 2011 term immediately following high school graduation  
Includes students who first enrolled in the summer 2011 and continued in fall 2010

### 3. High School Determination

Based on the ACT high school code as reported by public higher education institutions  
Students are included in this report only if they have an identified high school of origin

### 4. Higher Education Sector of Enrollment

University enrollment includes both university main and regional campuses

Community college enrollment includes all 23 public community colleges, state community colleges, and technical colleges

**Note:** We do not present college 'Participation' rates in this report because the Ohio Board of Regents does not capture the private and out-of-state college enrollment data necessary to generate a complete college participation rate. Instead, we report on the shares of public college freshmen who enrolled at university main and regional campus or community colleges. This is a distribution of students across the sectors, so the percentages will always add up to 100%.

### 5. Percent of Entering Students Taking Developmental Coursework

#### a. Definition of Developmental Courses

Developmental courses reported here include courses in mathematics and English whose purpose is to prepare students to take college level courses in those subjects. Developmental courses do not contribute towards certificate, associate degree, or bachelor's degree graduation requirements.

#### b. Time Period for Tracking Developmental Course Enrollment

For the purpose of this report, only developmental courses in the terms of the first year of college enrollment (summer 2011, fall 2011, winter 2012, and spring 2012) are included in the developmental course enrollment rates.

### 6. Source of Higher Education Data

Student and course level data as reported by public higher education institutions to the Ohio Board of Regents through the Higher Education Information (HEI) system.
