Subject: General and Specific List – Capital Appropriations in S.B. 310 of the 133rd General Assembly

As specified in Section 126.14 of the Ohio Revised Code, following the passage of any act appropriating money for capital projects, the Director of Budget and Management is required to determine which capital appropriations are for general projects and which are for specific projects and to then provide a list of these determinations to the Controlling Board. The Director of Budget and Management is then authorized to release appropriations for specific projects, while only the Controlling Board may release those appropriations for general projects or for the purchase of real estate.

The attached document identifies those appropriations authorized in S.B. 310 of the 133rd General Assembly (the FY2021-2022 capital bill) that have been determined to be for specific projects and those that have been determined to be for general projects.
