

Subgroup Meeting Summary

Subgroup #: 5 - Secondary/Postsecondary Content & Instruction Alignment

Meeting Date: 12.16.14

Meeting Time: 10:00 a.m. - Noon

Meeting Location (WebEx, OBR, etc.): WebEx

Subgroup Decisions/Meeting Outcomes:

Membership has expanded to include high school mathematics faculty members. After introductions and a review of the Subgroup 5 Charge, members held a discussion on: Ohio High School Graduation Requirements; the Ohio Transfer Module (OTM) and its work to define college level coursework and provide prerequisite flexibility for OTM courses; high school to higher education alignment work under way in Ohio; shared concerns in mathematics courses in high school and college; future work plan to discuss: the use of technology, e.g. calculators, in classes and homework; fourth year courses in high school; expectations for student learning in all courses; the ways students learn mathematics; and the impact of selectivity in college admissions on students. The group then turned its attention to planning for the Ohio Mathematics Initiative Spring 2015 Student Success Summit and Convening. It was determined that the event will take place in mid to late April 2015 in Columbus. A summit planning subcommittee will make recommendations to the full Subgroup 5 membership in January.

Subgroup Homework/Follow-Up (if any):

1. Establish summit planning subcommittee to recommend structure and goals of summit
2. Identify date and venue for summit

Next Meeting: January date, TBD
