

**Career-Technical Credit Transfer (CT)²
Industrial Power Technology Career-Technical Assurance Guide (CTAG)
February 27, 2017**

The following course, indicated by the Career-Technical Articulation Number (CTAN), is eligible for post-secondary credit and transfer among Ohio's public secondary career-technical institutions and state institutions of higher education. The SCTAI alignment document with ODE competencies and post-secondary learning outcomes can be found on the ODHE website at <https://www.ohiohighered.org/sctai/ctags>.

CTAIE001 – Hydraulics and Pneumatics Systems	Credits: 2 Semester Hours
<p>Advising Notes: In order to access post-secondary college credit for this CTAN, the student must:</p> <ul style="list-style-type: none"> • Matriculate to an institution of higher education, with an approved or comparable program, within 3 years after completing the approved secondary program • Successfully complete the ODE secondary course [Hydraulics and Pneumatics (010225)] with a “C” or better from an approved secondary program and earn a qualifying score of 61 or higher on corresponding End of Course examination 	<p>CERTIFICATE OF AFFIRMATION: Can be used for course submission through CEMS. https://www.ohiohighered.org/transfer/ct2/affirmation</p>

This CTAN identifies the learning outcomes that are equivalent or common in introductory technical courses. In order for students to receive credit under this agreement, the career-technical programs and the state institutions of higher education must document that their course/program content matches the learning outcomes in the CTANs.

Requirements and Credit Conditions:

1. The receiving institution must have a comparable program, major, or course that has been approved through submission to the Ohio Department of Higher Education (CT)² approval process for the CTAN listed in this document.
2. Credits apply to courses in the specified technical area at Ohio's public institutions of higher education, if the institution offers courses in the specific technical area. In the absence of an equivalent course, and when the institution offers the technical program, the receiving institution will guarantee to grant and apply an equivalent credit value of the Career-Technical Articulation Number (CTAN) toward the technical requirements of the specific degree/certificate program.
3. The applicant must provide proof to the receiving institution that she/he completed a course that has been approved through the (CT)² approval process and that she/he holds the appropriate credential or has passed the end-of-course assessment(s).
4. A career-technical student seeking credit under the terms of this CTAG must apply and be accepted to the college within three years of completing a career-technical education program.
5. A career-technical student who meets all eligibility criteria will receive the credit hour value for the comparable course(s) as offered at the receiving state institution of higher education.
6. The admission requirements of individual institutions and/or programs are unaffected by the implementation of (CT)² outcomes.
7. The transfer of credit, through this CTAG, will not exempt a student from the residency requirements at the receiving institution.

Secondary Career-Technical students must complete the Agriculture and Industrial Power Technology Pathway to be eligible for credit under this CTAG. This pathway is outlined in the Ohio Department of Education's Agriculture and Environmental Systems Career Field Technical Content Standards.

CTAIE001 – Hydraulics and Pneumatics Systems

Credits: 2 Semester Hours

General Course Description: This course focuses on skills and technologies essential for students to learn physical principles of hydraulics. They will diagnose problems, test system components, properly maintain hydraulic circuits and diagnose and test problem areas in hydraulics systems of agricultural and industrial power equipment.

Credits: 2 Semester Hours

Learning Outcomes:

1. * Understand and identify the dangers associated with fluids under high pressure and follow all safety practices
2. * Describe the principles of power hydraulics
3. * Identify and explain the function of each component of a hydraulic system
4. * Use hydraulic schematics to analyze diagnose, test, and troubleshoot
5. * Develop a preventative maintenance program for a hydraulic system

**Industrial Power Technology Panel Participants
2013-2016**

Ken Belk	Marion Technical College	SCTAI Panel Lead Expert
E. Craig Wiget	Ohio Department of Higher Education	SCTAI Panel Lead Expert
Michael Fisch	Kent State University	SCTAI Panel Lead Expert
Steven Ash	Sinclair Community College	SCTAI Panel
Bernard Goedde	Owens Technical College	SCTAI Panel
Steve Levin	Columbus State Community College	SCTAI Panel
Charles Butler	Cincinnati State Technical & Community College	SCTAI Panel
Paul Lee	ATI, The Ohio State University	Item Writer
Eric Lowe	Stark State Community College	Item Writer
Cyndi Brill	Ohio Department of Education	Program Specialist
Kevin Williams	Ohio Department of Education	Education Specialist
John Wiseman	Ohio Department of Education	Education Specialist
E. Craig Wiget	Ohio Department of Higher Education	Special Coach
Tim Keller	Ohio Department of Higher Education	Assistant Director, SCTAI
Anne Skuce	Ohio Department of Higher Education	Senior Associate Director, SCTAI
Misty McKee	Ohio Department of Higher Education	Assistant Director, SCTAI
